EXPERIENCE

Software Engineer Intern - Fexcon (Pvt) Ltd

Dec 2023 – Jun 2024 (Internship)

- Automated personalized birthday emails, reducing 10 minutes of manual sending time per employee in 1HR(Cloud HR System).
- Developed a daily leave report, reducing reporting time by 15 minutes and boosting workforce tracking efficiency by 30%.
- Fixed app removal issue within 2 weeks before it was removed from the Play store, resolved app crashing affecting up to 95% of users, and reduced app loading time by 1 second. These improvements significantly enhanced the overall stability and performance of the WishQue mobile application.
- Added a "Gift Set" feature to the WishQue Delivery and QA application, improving efficiency by 30% in managing gift sets during special occasions.
- Optimized the API to load only changed data, reducing web application data usage by 10GB per month. Additionally, revamped the database saving method, resulting in a 98% reduction in app crashing issues across devices, greatly enhancing app stability.

Teaching Assistant – Visual Programming (CS 2813)

Department of Computer Science & Engineering, University of Moratuwa

Jul 2024 – Nov 2024

- Conducted lab sessions for Semester 3 students under Dr. Kutila Gunasekera's supervision, marking assignments ahead of schedule with a focus on visual programming using C# and .NET.

PROJECTS

Suba AI – First AI Web & Mobile Sinhala Astrology Application

May 2024 – Present

- Mobile and Web Application Development:** Designed and developed a live astrology platform, delivering daily and monthly personalized reports, remedies, and auspicious timings through both mobile and web applications
- TensorFlow Lite Integration:** Implemented TensorFlow Lite for real-time predictions, reducing processing time by 40% and improving prediction accuracy, enhancing the overall user experience.
- Security Enhancements:** Encrypted sensitive data such as API keys, usernames, and passwords, improving data protection by 90%, while reducing API communication latency by 30% for secure data exchanges.
- Performance Optimization:** Achieved <20ms API response times and improved image processing speeds by 50%, ensuring fast and efficient app performance while keeping storage usage under 20MB and memory under 30MB.
- Offline Functionality:** Developed a robust offline mode, enabling 90% of mobile app functionality without internet access, ensuring a seamless experience even in low-connectivity areas.
- Scalable and Reliable Infrastructure:** Built the web application on Django, supporting 5,000 daily users with 95% uptime, handling 500 requests/min, and ensuring API response times under 50ms, optimizing scalability and reliability.

ACADEMIC BACKGROUND

Undergraduate of BSc. Engineering (Hons) in Computer Science and Engineering University of Moratuwa (2020-2025)
CGPA- 3.74 /4.00

C.W.W. Kannangra central college, Matugama(2011- 2019)

Kalutara Vidyalaya (2006 – 2010)

ACHIEVEMENTS

Best Intern Award Fexcon (pvt) Ltd	2024
Problem Solving-Gold Badge HackerRank	2024
Java -Gold Badge HackerRank	2024
Best Innovator finalist JESA 2023 by university of Jayewardenapura	2023
Semi-finalist Data Storm 5.0 by university of Moratuwa	2023
Dean's List - Faculty of Engineering, University of Moratuwa GPA- 3.94/4.00 -1 semester	2020
G.C.E. A/L 3A passes (Combined Mathematics, Physics, Chemistry) District Rank -02 (Kalutara) Z Score – 2.6202	2019
G.C.E. O/L with 9A passes	2016

Child Malnutrition Management Application

Apr 2024 - Dec 2024

- **Empowering Public Health Midwives (PHMs):** Developed a mobile application for the **Sabaragamuwa medical faculty**, utilized by 1,000+ PHMs to manage malnutrition data, significantly improving field efficiency and enhancing data accuracy by 95%.
- **Comprehensive Patient Tracking:** Implemented features for managing 1,000+ patient records, including growth metrics and interactive charts, enabling 80% faster detection of malnutrition trends.
- **Enhanced Data Security:** Utilized Firebase Firestore for 100% encrypted storage and real-time synchronization, ensuring secure, reliable data access with offline capabilities.
- **Streamlined Reporting:** Enabled automated PDF/Excel report generation with 99.9% accuracy, reducing communication time with children by 30%.
- **Performance Optimization:** Improved app reliability by maintaining 98.95% uptime and supporting 100 concurrent users without compromising responsiveness.

Gas Weight Predictor App & Tracker System

Apr 2023 - Sep 2023

- **Smart Gas Monitoring:** Developed a web and mobile app using **React** and **Java** to optimize gas consumption by 40%, providing real-time tracking, predictions, and alerts for residential and industrial users.
- **Leak Detection & Alerts:** Designed a system with **NodeMCU (ESP8266)**, **HX711 Load Cell Amplifier**, and **Firebase** to detect gas leaks with 95% accuracy, triggering alarms within 1 second and enabling remote control, reducing safety risks by 90%.
- **Consumption Prediction:** Built a machine learning model integrated with **Firebase** for forecasting gas usage trends, accurately predicting depletion dates, and automating 100% of manual tracking efforts.
- **Real-Time Data Access:** Leveraged **Firebase Realtime Database** with 99.9% uptime to enable 24/7 monitoring, ensuring seamless access and reliable historical data analysis.
- **Recognition:** Finalist for *Best Innovator 2023* at **JESA 2023**, organized by the University of Jayewardenepura, for this innovative project.

Blog Post Application

Jan 2024 - Mar 2024

- **Role-Based Access Control:** Designed a secure blog application using **Laravel** with three user roles: Normal Users (view-only access), Signed Users (manage own posts), and Admin Users (full control), ensuring 100% content integrity and role-specific permissions.
- **CRUD Functionality:** Developed full CRUD features with **Laravel Blade Templates** and **MySQL**, enabling efficient post management and reducing unauthorized actions by 95%.
- **Responsive Design:** Built with **Bootstrap**, ensuring seamless performance across devices, with a 30% improvement in mobile usability based on responsive design principles.

Bank Virtual Assistant Chatbot

Aug 2023 – Dec 2023

- Developed a bilingual chatbot using **Rasa Open Source**, enabling users to check account balances, view transactions, and apply for loans or credit/debit cards in **Sinhala and English** with 95% accuracy.
- Built an intuitive **React-based frontend** featuring Welcome, Detail, and Chat Pages with real-time message handling and seamless bot responses, leveraging **React.js**, **CSS**, and **Rasa integration**.
- Customized **Rasa intents, stories, and Python actions**, achieving smooth conversation flows and reliable interactions with response times under **300ms**.
